

Problem Statement

Nowadays, most of the people waste their valuable time in social media and other unnecessary things. Some people try to control their habit but fail due to lacking of proper management and determination. Specially our young generation are careless about time ,money and task management. They are seemed to be busy with unnecessary tasks rather than the tasks they should be doing. So, they might face several challenges:

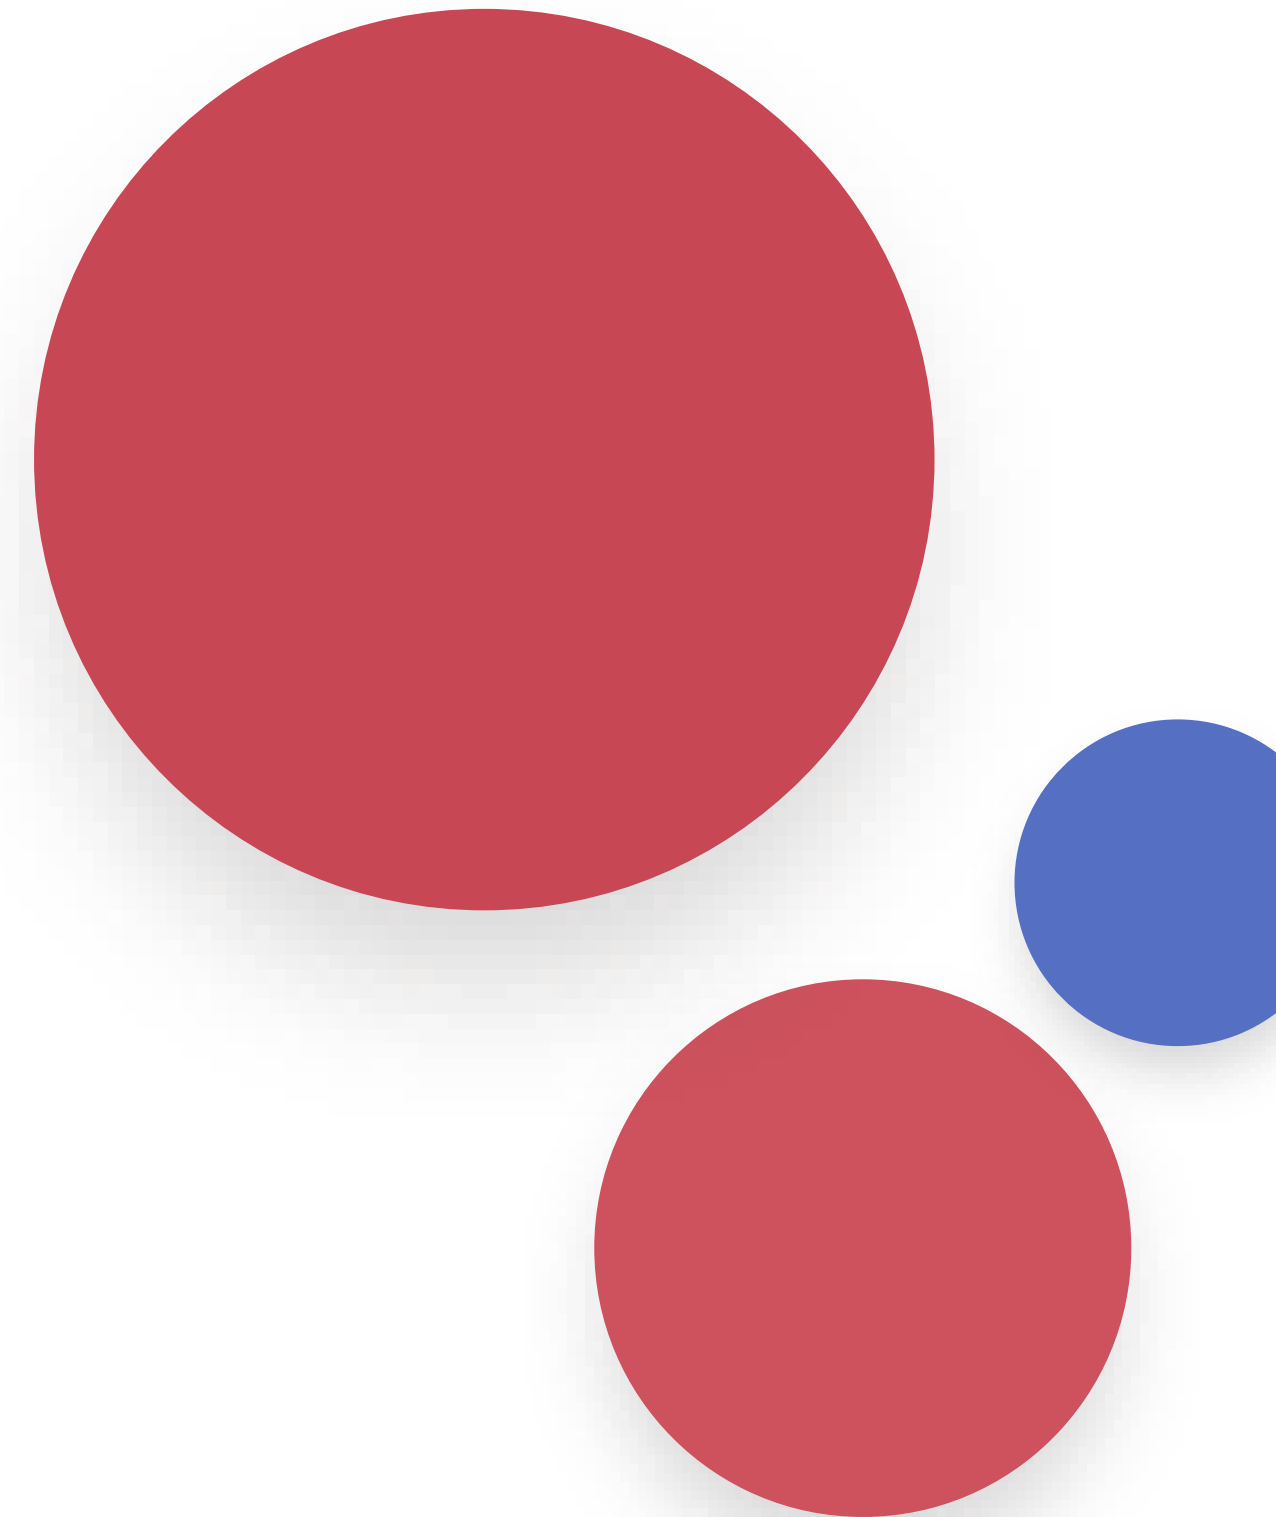

Time management issues, forgetfulness, financial mismanagement, disorganization and decreased productivity.

Solution

To solve this problem, we've thought of bringing a tool that can track our day to day tasks. Also we wanted the tool to remind us our scheduled tasks.

The "My Reminder" Android application offers a comprehensive set of features designed to enhance productivity and organization for users. Here are the advantages of each feature:

1.Timer

- Helps users track time for specific tasks or activities.
- Useful for setting reminders for short-term activities like cooking, exercising, or studying.
- Improves time management and productivity by keeping users on track with their schedules.

2.Stopwatch

- Enables users to measure the duration of activities accurately.
- Ideal for tracking workout sessions, sports activities, or any other tasks that require precise timing.

3.TO-DO

- Helps users track time for specific tasks or activities.
- Useful for setting reminders for short-term activities like cooking, exercising, or studying.
- Improves time management and productivity by keeping users on track with their schedules.

4.My Expense Tracker

- Enables users to measure the duration of activities accurately.
- Ideal for tracking workout sessions, sports activities, or any other tasks that require precise timing.

5.Task Reminder

- Helps users track time for specific tasks or activities.
- Useful for setting reminders for short-term activities like cooking, exercising, or studying.
- Improves time management and productivity by keeping users on track with their schedules.

6.Location Reminder

- Enables users to measure the duration of activities accurately.
- Ideal for tracking workout sessions, sports activities, or any other tasks that require precise timing.

7. GPS Tracking System

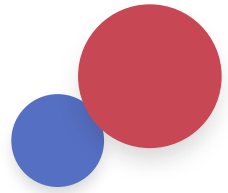

- Helps users track time for specific tasks or activities.
- Useful for setting reminders for short-term activities like cooking, exercising, or studying.
- Improves time management and productivity by keeping users on track with their schedules.

8. Notepad

- Enables users to measure the duration of activities accurately.
- Ideal for tracking workout sessions, sports activities, or any other tasks that require precise timing.

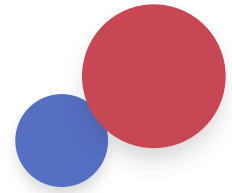

Used Tools & Technologies (Software Requirements)

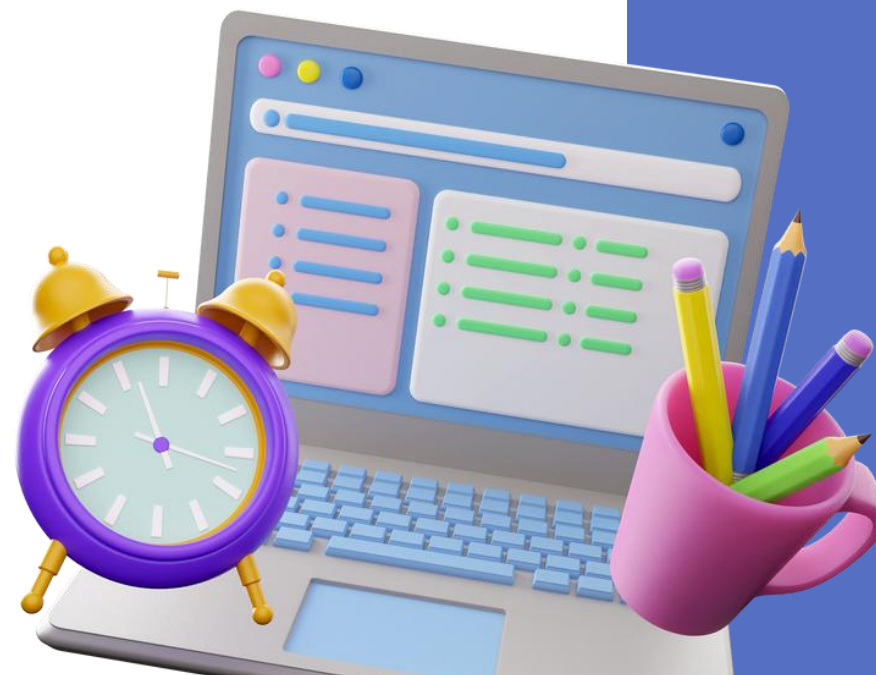

- **Front End:** Android Studio XML.
- **Back End:** Java, Firebase
Realtime Database
- **Operating System:** Android OS
- **API Keys:** Google Maps API

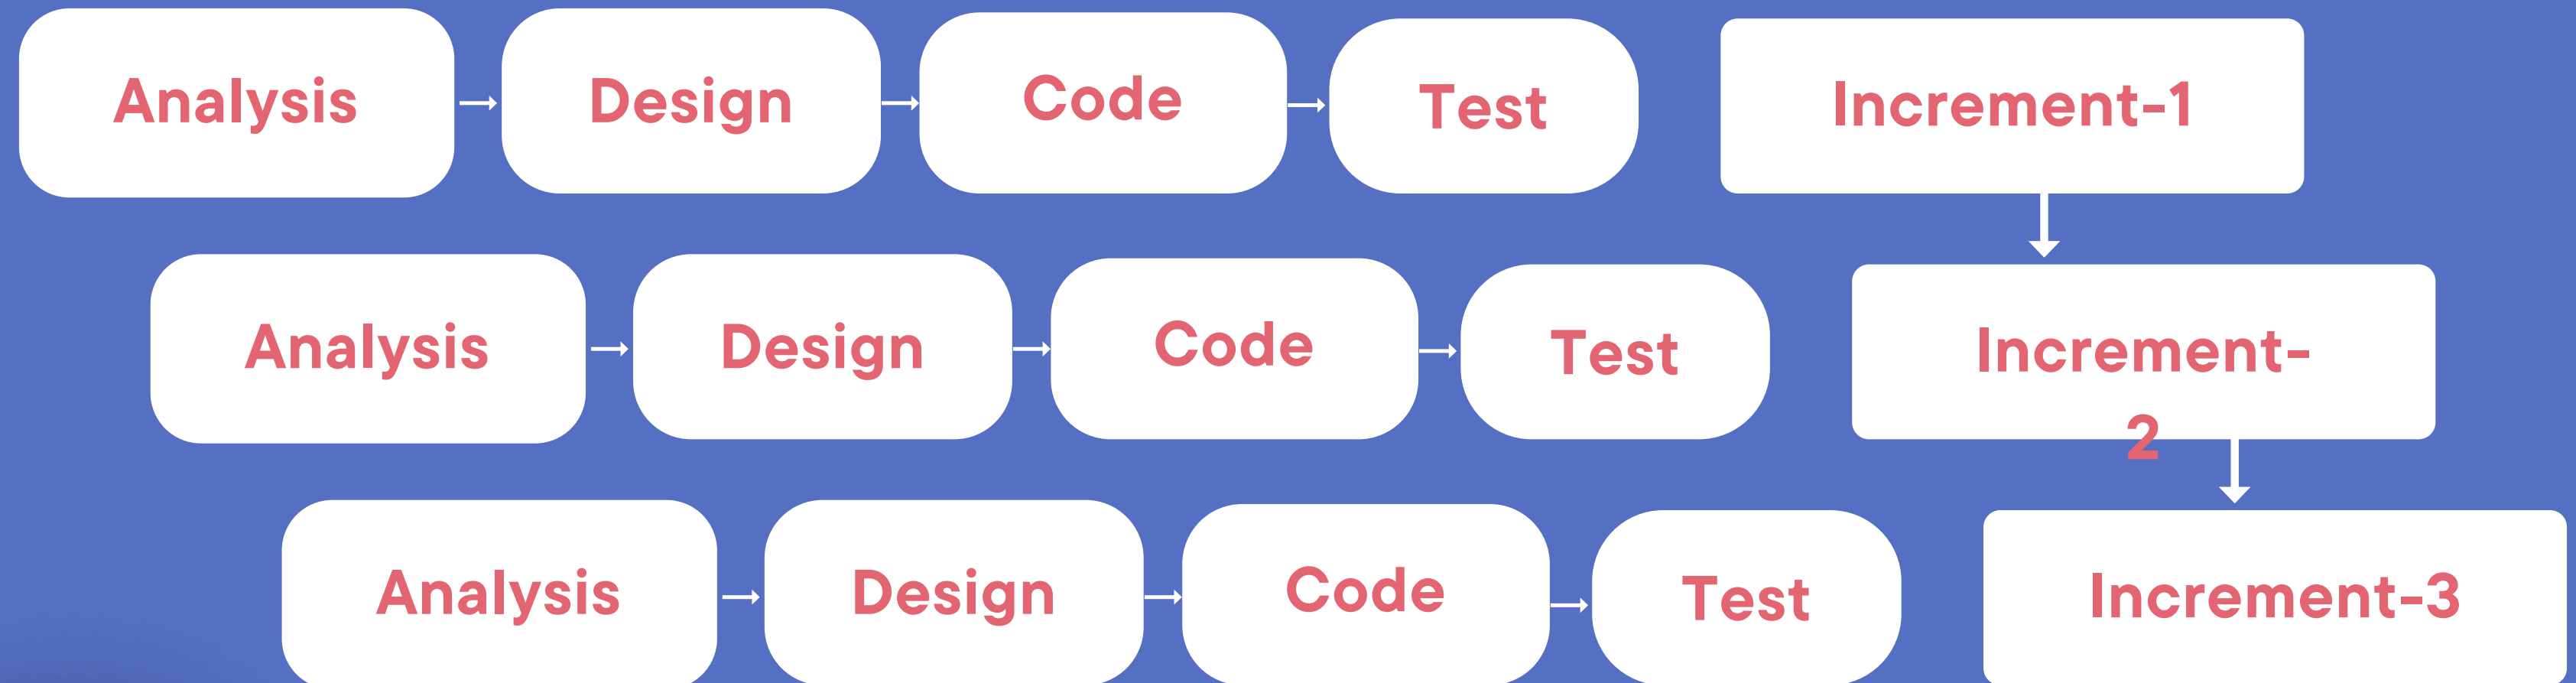

Used Tools & Technologies (Hardware Requirements)

- **CPU Architecture:** ARM/ARM64
- **RAM:** 1GB(at least)

Software Development Model

Incremental Model

Incremental Model

Incremental Model

Incremental Model is a process of software development where requirements are broken down into multiple standalone modules of software development cycle. Incremental development is done in steps from analysis design, implementation, testing/verification, maintenance.

Each iteration passes through the **requirements**, **design**, **coding** and **testing** phases. And each subsequent release of the system adds function to the previous release until all designed functionality has been implemented.
